

FEEDBACK

it counts

Your feedback is important. UWS conducts regular surveys asking students about their uni experience and how it can be improved. As a direct result of your feedback in 2005, the University is:

- » Introducing an online course advice system
- » Improving access to learning materials through WebCT
- » Building an online enrolment system to save you time and trouble
- » Setting up an online system to make sure your queries are resolved
- » Increasing the number of computers at targeted campus libraries
- » Reviewing bus services at peak times
- » Making assessment clearer, fairer and more relevant
- » Improving campus security
- » Strengthening the promotion of various student support services
- » Liaising with uwsconnect regarding the quality and consistency of food operations at all campuses
- » Enhancing our orientation program based on your ideas
- » Building a new teaching building which includes new computer labs at the Parramatta Campus
